

Site centered environmental report showing information from Ordnance Survey Ireland, Geological Survey Ireland and the Environmental Protection Agency.

Description: A site centered report outlining environmental information collected by Ordnance Survey Ireland, Geological Survey of Ireland and the Environmental Protection Agency. The report outlines information on an area of land, based on a specified location and covers an area with a radius of 400m, 600m or 1000m from a specific geo point (excluding any land outside of the Republic of Ireland).

Information provided includes: Historic Flood Plains, Seasonal Lakes, Spring and Swallow holes, Historic Mill and Mines Aquifer, Bedrock, Landslides, Karst, Vulnerability, Groundwater Wells, Active Quarries, Water Catchment, IPC, Registered Waste, Sites, Soils, River Basins, Bathing water quality.

Data Series: Results are displayed in location using OSi's 1:1000, 1:2500 or 1:5000 large scale data as appropriate. An aerial image and historic 6inch and 25inch maps of location are included as part of report.

Coverage: Republic of Ireland.

Specifications: File is delivered via email or hardcopy by post. Available in ITM (Irish Transverse Mercator).

File Formats: PDF.

Contact: Order online through www.osismartmaps.ie or www.osi.ie and follow link. Payment by Credit Card.
