Large Scale Data
1:2,500 Scale Data

1:2,500 scale data of suburban and periurban areas in vector and raster format

Description:

**Vector:** A dataset with all features coded or multi-coded to represent topographical features. The vector (point, line and polygon) data can be displayed at any scale with individual layers capable of being omitted or individually shown.

**Raster:** Scanned image of vector data at 500 dpi, reproducing data as represented on published map sheets.

**Data Source:** This product is derived from aerial photography and maintained by a combination of aerial photography and field completion.

**Coverage:** There are presently 4,700 tiles covering selected suburban and periurban areas of Ireland, each measuring 2000m x 1500m (300ha). A structured revision programme is in place with the aim of revising suburban maps annually and periurban maps every three years.

**Specifications:** The data is supplied under 35 or 179 levels layered structure, including administrative boundaries, roads, water features. Produced on the Irish Grid (IG) or Irish Transverse Mercator (ITM) with 2D coordinates in metres.

**File Formats:** Supplied in: DXF, DWG and NTF format
