

1:5,000 scale data of rural areas in vector and raster format

## Description:

**Vector:** A dataset with all features coded or multi-coded to represent topographical features. The vector (point, line and polygon) data can be displayed at any scale with individual layers capable of being omitted or individually shown.

**Raster:** Scanned image of vector data at 500 dpi, reproducing data as represented on published map sheets.

**Data Source:** This product is derived from aerial photography.

**Coverage:** There are presently 7,000 tiles covering rural areas of Ireland, each measuring 4000m x 3000m (1200ha). A structured revision programme is in place with the aim of revising the maps every five years.

**Specifications:** The data is supplied under 35 or 179 levels layered structure, including administrative boundaries, roads, water features. Produced on the Irish Grid (IG) or Irish Transverse Mercator (ITM) with 2D coordinates in metres.

**File Formats:** Supplied in: DXF, DWG and NTF format

**Contact:** Digital Sales, Ordnance Survey Ireland, Phoenix Park, Dublin 8, Ireland.
